

# **Hackathon Day 3 Task Completion**

**\*\*Name:\*\* Muhammad Umar**

**\*\*Template Used:\*\* Template 5**

## **## Task Completion Details**

### **### Task Overview**

On Day 3, I successfully completed all three tasks assigned for the hackathon using Template 5. Below are the detailed steps followed to complete each task:

---

### **### Task 1: Setting Up the Template**

1. Selected Template 5 from the given options.
2. Set up the initial structure using the provided codebase.
3. Configured the environment to ensure all dependencies were installed correctly.
4. Verified the layout and components were rendering properly.

---

### **### Task 2: Customizing Features**

1. Updated the design elements to match the requirements of the

**project:**

- Adjusted colors and typography for branding consistency.
  - Integrated dynamic components where needed.
2. Added interactivity using JavaScript/TypeScript.
  3. Ensured responsiveness using Tailwind CSS:
    - Verified on multiple devices (desktop, tablet, and mobile).

---

### **### Task 3: Finalizing and Testing**

1. Tested the entire template for functionality:
  - Checked navigation links.
  - Ensured buttons were fully operational.
  - Verified forms and other interactive elements.
2. Debugged minor issues related to responsiveness and UI alignment.
3. Optimized the code for performance and readability.
4. Prepared the final build for deployment.

---

### **### Additional Notes**

- Followed best practices for coding and styling.
- Ensured the project met all the specified requirements.
- Documented the process thoroughly for future reference.

---

### **### Next Steps**

- 1. Push the completed work to the GitHub repository under the documentation section.**
- 2. Review Day 4 tasks and start planning for the next steps.**

---
